

APS Expands Warehouse Facility

Alliance Polymers(APS) adds another 6,000 sq. Ft needed for stockpiling ore TPEs, production facilities

ROMULUS, MI (October 15, 2012) - Now in its 4th year, the continent's only soft elastomers distributor, manufacturer and technical support resource, Alliance Polymers & Services, (APS) announces the addition of 6,000 more square footage at its headquarters facility near Detroit. The firm now operates out of a modern 18,000 square foot facility located only a few miles from Detroit's international airport.

“Growing sales from a larger base of TPE and TPU suppliers, the addition of full production line, a product testing lab and more storage/inventory needed required us to obtain more space,” note APS principals Roger Huarng and Stephane Morin. As a result, company sources continue, the firm is engaged in an aggressive hiring mode for internal sales personnel and independent reps throughout the country.

With this expansion, the firm plans to store as much as 40% more kinds and volume of various thermoplastic elastomers, among the styrenic-based TPEs, TPVs and Elastollan® TPUs (polyester and polyether thermoplastic polyurethanes).

Alliance Polymers & Services, LLC (APS) is a leading U.S. sales and service firm dedicated exclusively to providing soft elastomeric elastomers and technical support for them, including the Maxelast® line of thermoplastic elastomers (TPEs) and BASF Elastollan® brand of thermoplastic polyurethanes (TPUs). APS also offers compounding and other Additional information on the firm's TPE products and services, contact: Alliance Polymers & Services, LLC (APS), 30735 Cypress Road, Suite 400, Romulus, MI 48174.
