### **APS Elastomers Celebrates 5 Year Anniversary**

Romulus, MI (**September 30, 2014**) APS Elastomers, formerly known as Alliance Polymers & Services, celebrated five successful years in business. "These past five years have seen exciting changes, exponential growth and innovate solutions to our customers", says Stephane Morin, co-owner of APS Elastomers.

APS Elastomers was founded by two of the plastic industry's leading marketing and technical support executives, Roger Huarng and Stephane Morin in September of 2009. From modest beginnings in a 5,000 square foot building, APS has expanded to a 20,000 square foot warehouse which also houses a 63mm twin screw extruder dedicated to specialty elastomer compounds. "We are elastomer specialists whose mission remains the same; provide quick, affordable solutions with high performance results", says Roger Huarng.

APS Elastomers provides engineering service, technical support, and TPE materials (TPEs, TPVs, TPUs and other soft elastomers) for consumer and industrial applications. "We continue to expand our TPE portfolio by adding new product offerings and aligning ourselves with TPE partners to better serve our customers in North America", says Stephane Morin. Company offerings have grown to include Maxelast® TPEs, Viprene® TPVs, Huntsman Polyurethanes' IROGRAN® and AVALON® TPUs, Zythane® TPUs, TPE alloys, compounding series, and custom and standard soft elastomer formulations. "Our ability to source material globally, acquire new products and services insures we provide quality elastomers at the most competitive pricing", adds Stephane Morin.

For more information on how APS Elastomers can find cost-effective solutions, develop proprietary formulations, and enhance products faster and more efficiently, contact [info@apstpe.com](mailto:info@apstpe.com)
